WEBSITE RE-DESIGN

# Case Study

Seighteen Electricals Pvt. Ltd.

अक्षरजी,

आपने सही कहा था। मैनें कभी इस बात को महत्व ही नहीं दिया था कि कम्पनी की एक अच्छी वेबसाइट होने के क्या लाभ हो सकते हैं। परंतु आज जब हमारी नई वेबसाइट को देखता हूँ तो लगता है कि वाकई बात तो बनी है!

हमारे कम्पेटिटर की वेबसाइटों के आगे अब हमारी वेबसाइट काफी अलग और इक्कीस लगती है.

हमें कुछ इनक्वायरी भी प्राप्त हुई है. कुल मिलाकर नई वेबसाइट के काम से में बहुत खुश हूँ. कुछ अच्छा हुआ लगता है।

आगे आपसे <mark>ईमेल मार्केटिंग</mark> की बात करनी है। मुझे लगता है वो भी करना चाहिए।

The Re-design Story

### Making long story short -

Sharing here only the key points of the entire website re-design process:

 Founded by Mr. Narendar Kumar Sharma in 2006,
"Seighteen Electricals" – is the electrical construction management company.

The company has vast experience in electrical engineering and contract-based electrical constructions.

- They had a web presence before but the website was very basic. It looked as if somebody had quickly designed their website using very simple free tools available on the Internet. So naturally, we suggested a complete makeover of the website.
- In order to make something strong, you have to recognize its weaknesses. So as a first step, along with my internal team, I carried out an extensive website audit of their existing website, made comprehensive notes of what was missing and what needed to be changed, and after obtaining all the information Centronics Support proposed an all-new workable strategy.

(Want to know exactly what was missing in the previous version of the Seightseen Electricals website? Write to us and we will send you a bigger, more detailed version of this case study.)

 After submitting our report and getting approval we started design + development + coding of the website afresh.

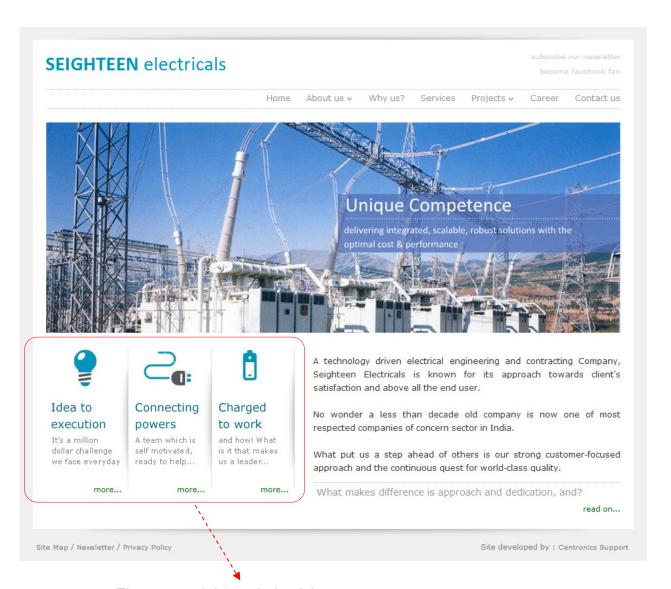

- Of course a lot went into creating the new design as we wanted to give it a professional look without losing the personal touch. We not only changed the visual layout we also brought forward the important bits of information that a visitor needs in order to decide in favor of the company. After the completion + checking + Meta / keywords integration we launched the new website.
- The new website is now rated among the best website in this category by the dealers and stakeholders.
- The new website has given a big impetus to work-related enquiries.
- The higher end niche look of the website worked well with new potential customers of the company and hence proved fruitful in terms of profitability.
- With a well-organized professional-looking website the sales team of the company finds it easier to approach new markets and customers and promote their business with greater confidence.

#### The makeover -

Presented below is the new, elegant and sleek look that gave the website an edge over other websites of similar business.

A well-thought-of landing page with attractive modules to help visitor get full knowledge about what-we-do-and-how-we-differentiate was perhaps the hallmark of the website. It gave visitors an opportunity to gain more knowledge with less clicks and within a short time.

Elegant modules to help visitor get more clarity about the work nature of the company.

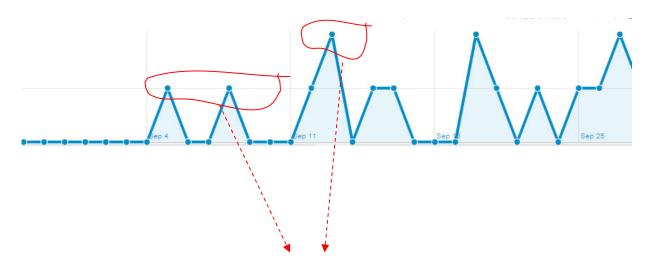

#### It's how you help the visitors -

We put **Newsletter Subscription** and **Business Enquiries** links on all the pages at the same location to pitch visitors to click and help the company get more leads.

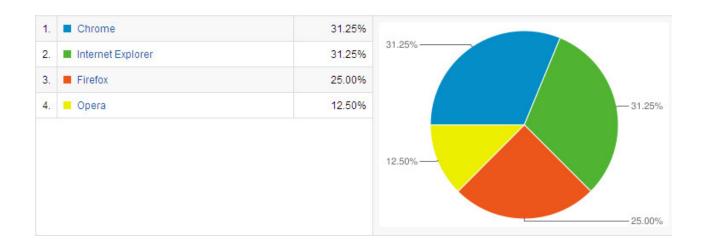

## The Result Speaks -

After the launch of the new website the visitors list started growing daily and new "towers" started building.

Google Analytics shows growth in site visits.

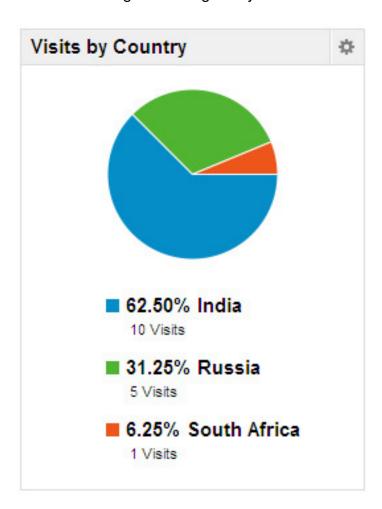

The new website is loved by all the browsers, making it available all the time across multiple platforms.

Visitors now spend a lot more time on the website. The site bounce rate dropped to remarkable 40%.

And the reach is going places globally. Google Analytics graph shows the website is being browsed globally.
